RAG System Test Document

This is a test PDF generated for the RAG system.

It contains sample text to verify the upload and text extraction features.

1. Upload Functionality: The file should be accepted by the server.

2. Text Extraction: The system should be able to read this text.

3. Summarization: The AI should be able to summarize these points.

If you are reading this in the RAG response, the test is successful.

The system is functioning as expected.

(Note: This document is in English to ensure font compatibility during generation.)

Section 2: Details

This is the second page, belonging to the 'Details' section.
